

In the Claims:

Please CANCEL Claims 1-5.

6. (NEW) A fishing tackle utility box for a user, comprising:
 - a housing;
 - at least one central cavity within said housing;
 - a cover in communication with said at least one central cavity;
 - at least one compartment within said housing accessible from said at least one central cavity, said at least one compartment having an access point; and
 - at least one tray in at least one of said at least one compartments.
7. (NEW) The fishing tackle utility box of claim 6, wherein said at least one compartment is configured to be accessed directly by the user once said cover is removed from said at least one central cavity.
8. (NEW) The fishing tackle utility box of claim 6, wherein said at least one compartment has said at least one tray arranged to open in a plane perpendicular to said access point of said at least one compartment.
9. (NEW) The fishing tackle utility box of claim 6, wherein said at least one tray has a front face in the same plane as said access point of said at least one compartment.
10. (NEW) The fishing tackle utility box of claim 9, wherein said front face of said at least one tray covers the access point, so as to prevent the contents of said at least one tray from being removed from said at least one tray unless said at least one tray has been pulled out from said at least one compartment.
11. (NEW) A fishing tackle utility box for a user, comprising:
 - a housing, having a top, a bottom, and a side;
 - at least one central cavity within said housing, said central cavity on said side of said housing;
 - a cover in communication with said at least one central cavity;
 - multiple compartments within said housing accessible from said at least one central cavity; and
 - trays in at least one of said multiple compartments.
12. (NEW) The fishing tackle utility box of claim 11, wherein said bottom is configured to rest flat and stationary on a flat surface.
